

**6 July | Babraham Research Campus**

**Register**

**ON Helix, our annual translational research conference on New Horizons for Bio Innovation will take place next week on 6 July at the Babraham Research Campus, with live online Innovation Workshops being held on 3, 4, and 5 July.**

**Don't Delay - Register Now for the Full Benefit**

With numbers approaching capacity, reserve your place now and participate in the face-to-face engagement, 1-2-1 partnering and innovation workshops. Register [HERE](#).

**Keynote Speaker and Panel Programme, Innovation Workshops and the ON Helix Fringe Events to Inspire, Inform and Initiate Debate and Deals**

**Keynote Speakers**

How to avoid translational science failing for non-scientific reasons in the shape of:

- **Creating an Innovation Space**, Tim Schoen, BioMed Realty
- **Why Does No One Discuss Supply Chain?** Paul Grindall, Biocair International

**Panel Sessions**

Gain invaluable insights and debate the key innovations and

technologies that are driving successful translation of research to better patient outcomes. Full speaker details are available [here](#).

### **New Horizons in Genetic Screening**

- How genetic screening can be applied to drive health and wellness along the life course.
- Moving towards a roadmap to use genetic data in a more diverse, sustainable, and ethical manner.
- Up-and-coming technologies, such as single-cell sequencing and other omics approaches.

### **New Horizons in Paediatric Medicines**

- Innovative approaches that will shape the future of clinical development for paediatric medicines.
- The biggest challenges in creating meaningful outcomes from design of studies to patient engagement.
- Early intervention in the management of adult disease that starts early in childhood.

### **New Horizons in Precision Oncology**

- A local case study from Astex to set the scene.
- Insights from past innovation journeys, lessons learned and addressing challenges that lie ahead in precision oncology.
- The role that collaboration will play in paving the way for personalised care.

### **New Horizons in AI-Based Prediction & Prevention**

- The possibilities of AI-based prediction and prevention for chronic disease.
- Exploring the readiness of AI, what it can and can't do.
- Ethical considerations of using AI in healthcare.

### **Longevity Depends on Understanding the Biology**

- Asking the right translational questions early.
- Achieving the right endpoints to measure longevity during clinical development.
- The most promising approaches that will get treatments over the line to patients and drive extended healthy lifespan.

### **When Do Good Neighbours Become Good Business Partners?**

- Valuable insights into the when good neighbours become good business partners and the significance of building local networks.
- Managing different business dynamics to help bring together convergence between biotech and tech companies.

- Case study examples, including those where proximity is not the defining factor.

### Interactive Live Innovation Workshops

- Sustainability Innovation: Drivers for Long Term Sustainable Value Creation and How to Leverage Design and Innovation Thinking to Drive Your Sustainability Ambitions, **EY**
- Two Innovation Showcase Sessions with companies presenting including, **Astex, Gigabiome, Macomics, Matrix Bio, Pharmenable, SiSaf** and **ValiRx**
- Key Questions You Need to Answer Before Translating Your Innovation to Impact, **Cancer Research Horizons**
- The Optimum Freedom to Operate Roadmap, **Appleyard Lees**
- Drug Discovery Solutions, **Pharmidex**

### Fringe Events

- 3 July - **Cambridge Biopharma Connect - Launch Trends and Drivers of Success** by ZS
- 4 July - **3rd Reverse Pitch Webinar: Collaboration Opportunities with Japanese Pharma Companies**
- 5 July - **The Good, The Bad and the Ugly: How to Sort your Start-up Legals**
- 5 July - **One Nucleus Summer Life Sciences Dinner**
- 6 July - **BiotechBikers, Cambridge UK**

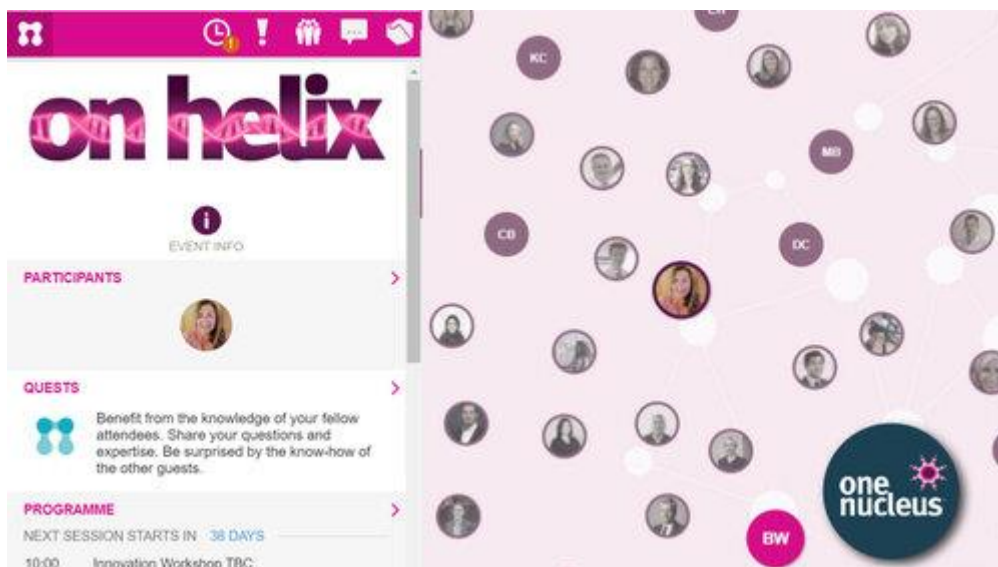

### Who Will You Meet?

Build vital connections with your [key audience](#) who are already arranging 1-2-1 meetings and raising their profile to clients, partners and investors.

### Enhanced Connectivity

Arrange 1-2-1 virtual meetings with fellow delegates via the event app before and for up to four weeks after the conference.

Check out the [full details](#) of ON Helix 2023 and we look forward to seeing you there!
