

## **New collaboration between SLAS and One Nucleus**

***30 May 2019 - Cambridge UK:***

Both One Nucleus and SLAS share a desire to facilitate greater knowledge-sharing, collaboration, connectivity and technology advancement among their respective memberships. The content of One Nucleus and SLAS training courses and events is felt to be very complementary rather than competitive and hence both are keen to collaborate to raise awareness of and engagement in the other's activities within their own membership groups.

"SLAS is pleased to collaborate with the UK's One Nucleus to promote and incentivise our members' participation in what are very complementary educational initiatives and events," says SLAS CEO Vicki Loise. "By expanding access to our respective events and resources, SLAS and One Nucleus members gain valuable opportunities to expand their knowledge and tools to do their jobs better." SLAS hosts two annual conferences – one in the U.S. and one in Europe – four topical symposia, and launched APPLIED, an online education platform in March 2019.

Tony Jones, CEO of One Nucleus expands further 'Collaboration is in the DNA of Life Science companies as they partner and outsource in order to progress innovative treatments. It is important that membership groups collaborate to connect their respective networks in order to maximise the shared-learning available. Our collaboration with SLAS offers our members access to their knowledge base, connectivity and training at discounted rates to facilitate interaction and progress across our two complimentary foci in the sector.'

ENDS

## **About SLAS**

SLAS (Society for Laboratory Automation and Screening) is an international not-for-profit society whose mission is to bring together multidisciplinary researchers in academia, industry and government to advance life sciences discovery and technological innovation via education, knowledge exchange and global community building.

SLAS, in addition to its educational events noted above, provides career mentoring services, supports emerging and start-up companies in laboratory innovation, and bestows numerous awards and grants to recognize and advance scientific study and innovative accomplishments annually. SLAS also publishes two vigorously peer-reviewed scientific journals, *SLAS Discovery: Advancing Life Sciences R&D* and *SLAS Technology: Translating Life Sciences Innovation*.

## **About One Nucleus**

Established in 1997, One Nucleus is a not-for-profit Life Sciences & Healthcare membership organisation centred on the Greater London-Cambridge-East of England corridor. Headquartered in Cambridge, at the heart of Europe's largest Life Sciences & Healthcare cluster, we support those institutions, companies and individuals undertaking activity in or with the above region.

Through providing the local, UK-wide and international connectivity, One Nucleus seeks to enable our members to maximise their performance. This support helping them achieve, or better still exceed, the goals they have set for themselves. Biomedical and Healthcare R&D have always been impactful in driving social and economic progress. In an increasingly outsourced, collaborative and multi-disciplinary sector, bringing the best people together is key to translating great innovation into great products that markedly improve patient outcomes and drive economic development. Attracting and enabling the best people to engage with is at the heart of the One Nucleus team ethos and what we continually strive to deliver.
