

Welcome to the July issue of Our People Pathways Newsletter!

This month's newsletter features our newly added upcoming courses, including the next BLSA SIG session on how to access a path to a greener business. Sign up below to secure your spot. Our first session on neurodiversity proved to be a huge success, and you can read about our key takeaways and reflections below. You can also read about some new and exciting opportunities from the Earlham Institute, our One Nucleus mentoring initiative and an interesting article from ABPI.

Take a look at our [training course offering](#), and make sure to follow us on [X](#) and [Linked-In](#). For more information about our in-house course options, please contact training@onenucleus.com.

15 October, Online | BLSA SIG: Embracing Efficiency - The Path to a Greener Business

This next BLSA SIG session will look at the Green Business Impact Programme presented by Jenny Wilton of PECT.

The Green Business Impact Programme is a fully-funded support programme to help businesses and charities become more energy efficient and sustainable. It is designed for organisations in Cambridge, Huntingdonshire, and South Cambridgeshire to help them reduce carbon footprint, improve energy efficiency, cut down on utility costs, and show their stakeholders how they are moving towards sustainability.

More details and an agenda to follow soon... [Secure your spot here!](#)

Exploring Neurodiversity: Key Takeaways and Reflections on Our Webinar

We're thrilled to share that our first BLSA SIG webinar on neurodiversity was a great success! The session brought together a wonderfully mixed audience, including HR professionals, managers, and scientists, all eager to learn and grow. It was incredibly inspiring to see such a high level of engagement from everyone who attended.

Monalisa Breazu, Learning & Development Administrator at One Nucleus and Elisabeth Goodman of RiverRhee Consulting cover the key takeaways of the session [here](#). To watch the webinar recording, [click here](#).

Earlham Institute Career Development Opportunity

As an international centre of excellence in data-driven bioscience and innovative technologies, the Earlham Institute is pleased to invite applications from Early Career Researchers wishing to transition to an independent research leadership post, pursuing bioinformatics, modelling, computational biology or engineering (synthetic biology) routes to investigate biodiversity and biological systems.

[Find more information and how to apply here.](#)

Young People's Perceptions of Careers in the Pharmaceutical Industry

Attracting the next generation of workers into the pharmaceutical industry is a critical part of building the pipeline of skills it needs to succeed. Polling shows the public has a generally favourable opinion of the industry and that this was boosted to some extent by its role during the COVID-19 pandemic. [Read an insightful article on this topic from ABPI here.](#)

New Mentoring Opportunity!

With a background in medicine and a career shift to biostatistics, data science, machine learning, and bioinformatics, this individual now leads a UK consultancy branch for clinical trials. They are looking for a mentor with 15+ years of experience in business, marketing, or business development, ideally in a similar field. They're also open to mentoring others with up to 5 years of experience in life sciences, biotech, and pharmaceuticals, offering guidance on career planning and business growth.

[Get in touch](#) with us if you can help or are someone who needs a mentor.
