

Welcome to this month's eNews

Writing my welcome from Boston this time whilst attending the annual **BIO International Convention** is always a busy time for many. It has been excellent to see over 400 UK delegates signed up at the event and catching up with them.

We are particularly grateful to BioMed Realty, Fish & Richardson and McDermott Will & Emery for each hosting a One Nucleus satellite session.

A particular focus for me this time was to explore how One Nucleus can support our members' interest in engaging with the Greater Boston Cluster and it has been an insightful trip. Perhaps unexpected has been the interest from other major groups in being more proactive in bringing our members together.

I'm very grateful to Thermo Fisher for hosting an excellent evening of networking for our membership groups at the home of 'Cheers' which accelerated the connecting.

The [UK as a Science Superpower](#) unsurprisingly has cropped up in number of discussions and what that means for building such global collaboration. More updates in due course.

Below you'll find more updates about the content of [ON Helix 2023](#); how sustainability sits high on the agenda of key suppliers; and some thoughts on why we should perhaps be optimistic about the future.

And there's more...don't forget you can stay fully up to date on our news, upcoming events and more via our [website](#), [LinkedIn](#) and [Twitter](#) channels or feel free to [get in touch](#) to discuss any related matters.

Tony Jones, CEO, One Nucleus

ON Helix 2023 Fringe Event: Cambridge Biopharma Connect - hosted by ZS Associates on 3 July

In this one-hour workshop, ZS experts Mark Rayward-Smith and Amer Dzankic will discuss:

- Launch trends and drivers of success
- Recent changes in the regulatory landscape

- Implications for clinical stage biopharma companies

Please click [here](#) to register or contact [Amer Dzankic](#)

ON Helix 2023 - New Horizons in Genetic Screening

Gain new insights on 'New Horizons in Genetic Screening' at ON Helix 2023 conference. Our panel will discuss how to create a roadmap for the sustainable and ethical use of genetic screening data to support better health and disease management across different stages of life. [Read More](#)

Enter our ON Helix BioNewsRound Award

In keeping with the translational research focus of ON Helix, we are looking for entries that have demonstrated success in advancing their programme along the innovation pipeline, be that a new therapeutic, diagnostic or enabling technology. [Find out how to enter here](#)

Saving Sustainably with One Nucleus Suppliers

One Nucleus members can access products and services from suppliers that support your organisation to reduce its environmental impact, and can make significant savings via our Group Purchasing Scheme and Member Marketplace. [Who are our Sustainable Suppliers?](#)

Investment-Technology-People: Complementarity of the Great Life Science Clusters Around Cambridge UK and Cambridge US

A look at the synergies between two of the world's most notable science innovation hubs and hence why building a better bridge between the two could support our members' success. [Read more](#)

Primed to be Released from the Shackles of a Difficult Investment Environment

Immersed in the sessions, networking and conversations at the BIO International Convention 2023 in Boston, Tony Jones, One Nucleus CEO, finds reasons for cautious optimism whilst the financing landscape remains challenging - [Read more](#)
