

## People Pathways | June 2025

Your Monthly Round-up of Employee Engagement Opportunities

### Welcome to the June Issue of Our People Pathways Newsletter!

This month, we're focusing on professional development through our upcoming training courses, with a spotlight on the highly practical "Introduction to Drug Development" course, ideal for those early in their life sciences careers or from non-scientific backgrounds. We also highlight the renowned PATDD course in toxicology delivered by the Cambridge Academy of Therapeutic Sciences (CATS) and the British Toxicology Society (BTS), offering deep insights into non-clinical safety evaluation.

Whether you're building foundational knowledge or expanding specialised expertise, there's something here to support your journey. Enjoy the read!

## Training Course Spotlight: Introduction to Drug Development – From Candidate Selection to Patients in Healthcare

This one-day course is ideal for anyone looking to understand how a potential treatment becomes an approved medicine. Whether you come from a non-scientific background or are early in your life sciences career, you'll gain clear insights into the journey, from drug discovery and preclinical testing through clinical trials and regulatory approvals, to manufacturing, branding, and patient access. With an interactive format and expert-led sessions, it's a great way to build your knowledge and confidence in this complex but fascinating process. Don't miss out - [register now to boost your understanding and broaden your impact in the field!](#)

---

## Practical Application of Toxicology in Drug Development 2025

The highly acclaimed Practical Application of Toxicology in Drug Development (PATDD) course, co-organised by the Cambridge Academy of Therapeutic Sciences (CATS) and the British Toxicology Society (BTS) provides comprehensive training in toxicology as applied to drug development, catering to scientists from around the globe. Participants will gain a thorough understanding of non-clinical safety evaluation principles, with a strong focus on practical applications and interpreting safety data. Both European and US regulatory toxicology perspectives will be covered. [For more information and how to register take a look here.](#)
