16.35 - 17.35 Plenary Debate: What Drives Performance: Targets or Culture?

It is often the case that targets are used to drive performance yet is that really true or are targets just a means to measure performance as opposed to driving it? It could also be the case that it is not just culture alone that drives performance, since it may be an empowering environment to be in with lots of productivity, but without targets is that productivity aligned with the business need? The panellists each have a diverse and successful track record and based on their experiences will discuss how the right balance of culture and target can help maximise performance both within an organisation and externally in partnerships.

Chair  
**Mike Ward**  
EBD Group

Panellists  
**Vicki Loise**  
CEO, SLAS
