

## Welcome to this month's eNews

It feels like an exciting time to be penning the welcome section to a One Nucleus eNews edition. A few weeks to reflect on our presence at the **BIO Convention** and **RESI Europe**, complemented by local and cross-border discussions, has provided a context in which to consider how we support our members. **ON Helix** last week provided the ideal forum in which to continue refining and discussing our plans with key stakeholders.

The mix of articles by One Nucleus colleagues and our members in this edition illustrates some of the key threads of our on-going discussions. The amount of optimism and vision discussed about the **London-Oxford-Cambridge 'Golden Triangle'** is perhaps balanced only by the level of intra-UK angst and competition it fuels. Great opportunity for sure, but it does not have to be, or indeed should not be, at the expense of other UK locations. Data and thoughts shared in the articles below by **EY** and **Bristows** demonstrate that this is not a domestic industry. Indeed, I would argue that we have in fact been considering the wrong 'Golden Triangle' to drive the scale-up of the UK sector.

There are always local matters that require informing and shaping responsibly, however, and the items by **Cushman & Wakefield** and **Richard Dickinson**, Chief Technical Specialist, One Nucleus, provide context around location and facilities. The necessity to be more environmentally friendly affects us all, and **Jasmin Bannister**, Business Development Manager, One Nucleus, providing simple steps to a greener lab item is a welcome thought provoker.

We are, of course, living through changing times, highlighted by such an important day last Thursday, 4 July. Not only was it a great day of discussion, future-scoping and networking at **ON Helix**, helping to inform leaders, but it was also the day that the UK voted to decide who will form the UK government for the next few years. It seems likely that changing government policy or impact will not be as rapid as the rate of change in technology impacting R&D, patient stratification, and healthcare delivery, but both will no doubt influence how our sector develops in the UK and globally. One Nucleus' focus remains firmly on our mission to enable our members, irrespective of size, business model, or stage of development, to maximise their success.

Watch this space for updates on our plans for [Biotech Week Boston](#) (September), [BIO-Europe](#) (November), and [Genesis](#) (December), to name just a few of our key plans, with much more besides going on to support you. To stay informed of all One Nucleus updates, disseminate your company's news, or track the announcements from other members, you can make full use of our [website](#), [LinkedIn](#), or [X](#) pages. The [news stream](#) contains numerous updates from our community. Enjoy the read!  
**Tony Jones, CEO, One Nucleus**
