ON eNews

Welcome to this month's eNews

Welcome to this latest edition of the One Nucleus eNews. In another busy and productive month, it is, as with every month, a pleasure to update the network on some key activities and opportunities. Delivery of the Boston Bootcamp last week dominated the focus for some of the team.

The chance to take four competition winners to be immersed in the Greater Boston ecosystem; and learn from locally based experts about how the dynamics, business practices, public sector support, and investment trends can offer UK life science companies the chance to realise their scale-up aspirations.

The winners, sponsors, and experts made the week extremely productive and insightful.

It is with high anticipation that we await the [ON Helix 2024](#) panel session, where those winners will feed back those key insights to the wider One Nucleus network. The international connectivity this past month included hosting a delegation from Denmark and inviting our members to a lunch to uncover the benefits of working with Puerto Rico. To succeed in such a global industry, however, there are many aspects life science companies have to consider.

With this in mind, below you'll find links to articles from One Nucleus team members covering topics such as developing the right teams, getting prepared for due diligence, investment trends, and what events are coming up where such information can be put into practice.

In forthcoming initiatives, watch out for the One Nucleus engagement around the [BIO International Convention](#) (including a [breakfast seminar](#) and networking session) and the chance to be profiled in the ON Helix Review being launched at [BIO-Europe](#), where discounts and enhanced profiling opportunities are available.

It's All About the Money

Is the uncertainty in the biotech funding landscape transforming into more positive tones as we see Nasdaq IPOs happening and private investment rounds returning? Alicia Gailliez, Business Development Manager, One Nucleus provides some interesting stats. [Read more here.](#)

Life Sciences Training Made Easy: Your New Sat Nav Guide!

Building the best teams within the complex field of life sciences can frequently feel like venturing into unknown territory. To address this issue, One Nucleus has developed a Training Sat Nav for life sciences training, Monalisa Breazu, Learning & Development Administrator [explains...](#)

The Good Housekeeping Guide to Dealmaking

The Genesis Fringe affords participants access to a dynamic week where they can tailor their own agenda through which to connect with both Genesis attendees and

non-attendees to maximise their return. [Read the report](#) from the Genesis Fringe Event held on 6 December 2023 by Tony Jones, CEO, One Nucleus.

What's Coming Up with One Nucleus?

Mark your calendars with the various opportunities to network and learn about the sector by registering for some high value events, as signposted by Jasmin Bannister, Business Development Manager, One Nucleus. [Find out more here.](#)

To stay informed of all One Nucleus updates, disseminate your company's news, or track the announcements from other members, you can make full use of our [website](#), [LinkedIn](#) or [X](#) pages. The [News stream](#) contains numerous updates from our community. Enjoy the read!
